

Recondition your Business

Local company, Time Business Systems, has introduced reconditioned copiers, printers and scanners to their catalogue of products.

The economic climate, coupled with the increasing desire to become more eco-friendly, has meant an increase in demand for cheaper, greener office equipment. Time Business Systems have been quick to respond to this demand and this is already reflected in take up of the service.

Reconditioned units are just as reliable as their brand new counterparts. Each unit is stripped down to its chassis and rebuilt using high specification components. Any system updates are installed, so a machine has everything a new model would have.

Selwyn Burke, Managing Director of Time says; "Because we work with such a range of businesses in and around Dorset and Hampshire, we see all kinds of trends, but recently we've seen an upturn of interest in reconditioned units. Businesses are being cost conscious at the moment, more so than we have seen in the past. However, being environmentally friendly is also high on agendas and this is our solution to tackle both issues. We are seeing success in this area, in particular with small to medium sized businesses who want all the features of a new model, at a fraction of the cost."

Time Business Systems is dedicated to helping its customers save time, save money and save the environment!
